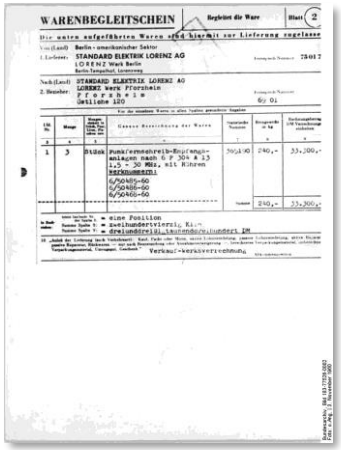
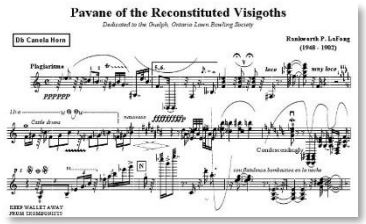
Document Analysis with Deep Learning

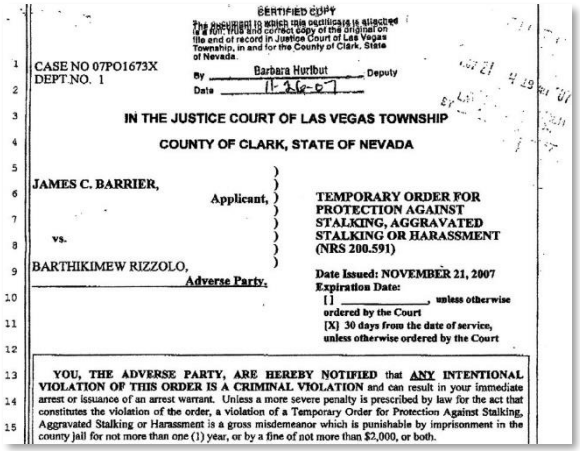
Use Case Talk Series, Zurich, Oct 31, 2018

Thilo Stadelmann

Document recognition?







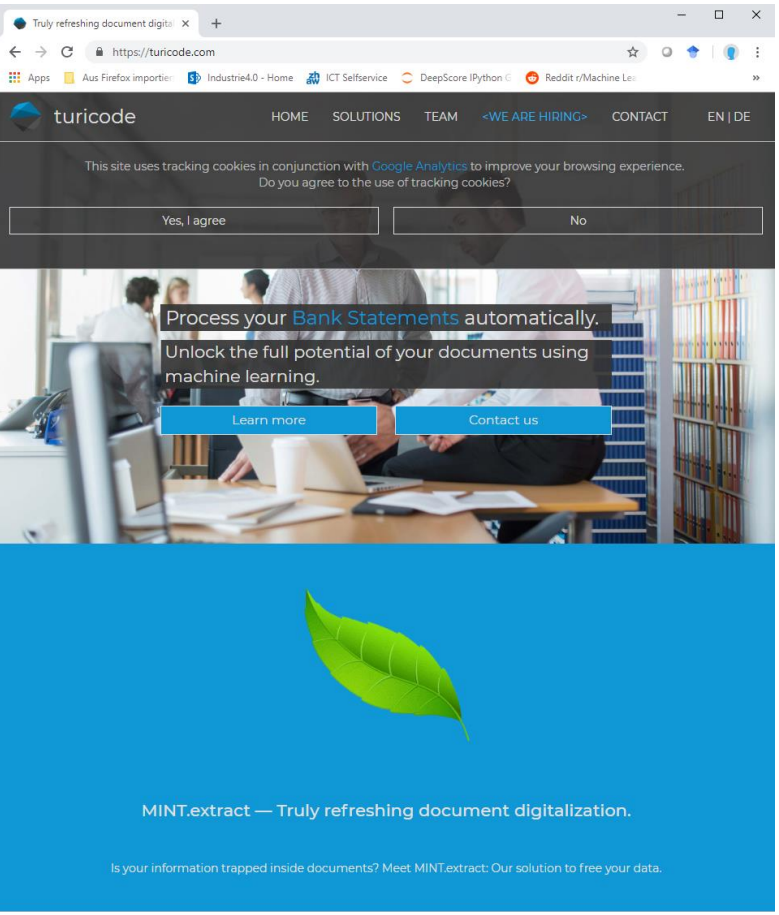
Documents

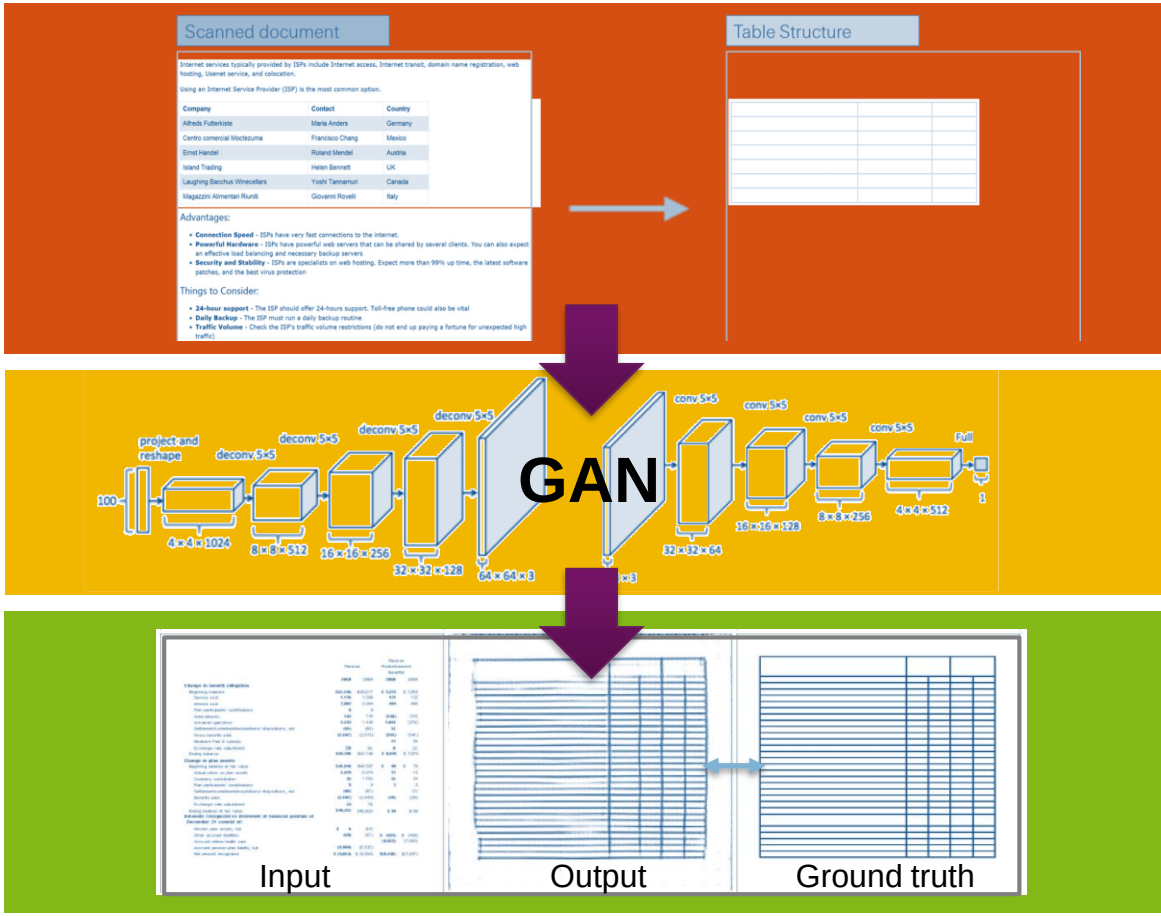
- **Ubiquitous** in human communication and every scenario involving an office
- Somewhat structured for human expert; **unstructured** w.r.t machines
- **Great use case for** various **AI** techniques, including computer vision techniques

Own scientific community

- IAPR's biannual Intl. Conference on Document Analysis & Recognition (ICDAR):
  character & symbol recognition, printed/handwritten text recognition, graphics analysis & recognition, document analysis & understanding, historical documents & digital libraries, document based forensics, camera & video based scene text analysis

Industrial examples

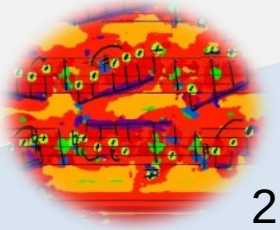




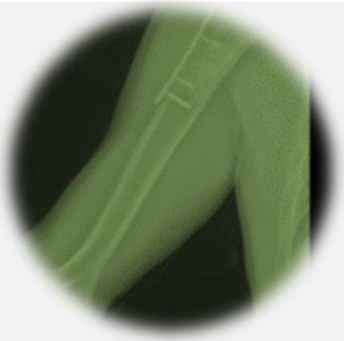
Roadmap

0. Prologue on document analysis

1. Print media monitoring



2. Music scanning



Conclusions

Zürcher Hochschule
für Angewandte Wissenschaften

1. Print media monitoring

Task

International.
Nachrichten
Spionage für den Erzfeind Iran
Israelischer Ex-Minister arbeitete als Agent für die Mullahs. Jetzt droht ihm lebenslänglich
Vermögen beschlagnahmt
Asylbewerber können bleiben
Europäischer Gerichtshof relativiert Abschiebepraxis
Nordkoreanischer Diktator zu Besuch in Peking
Klage von Le Pen abgelehnt

Challenge

Sport Blick 15
«Steven hat sich alles selber beigebracht»
Verlieren verboten!
Transfer TICKER
Liverpool will Yann Sommer!

Nuisance

Liebling der Sterne
Das Tages-Horoskop
15,1 Millionen
Sind Sie der nächste Lotto-König?
Wochenpreis: 1 x sieben Nächte für 2 Personen, inkl. HP, im ****Seehotel Pilatus Hergiswil im Wert von 3000 Franken!

2. Music scanning

Die Forelle.

Gedicht von Chr. Fr. D. Schubert.

Für eine Singstimme mit Begleitung des Pianoforte

componirt von

FRANZ SCHUBERT.

Erste Ausgabe.

Mässig.

Singstimme.

Pianoforte.

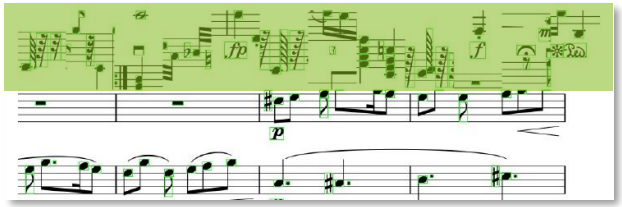
Recent results on class imbalance and robustness challenges

1. Added sophisticated **data augmentation** in every page's margins



2. Put additional effort (and compute) into hyperparameter **tuning** and **longer training**
3. Trained also on scanned (more **real-worldish**) scores

➔ **Improved** our **mAP** from 16% (on purely synthetic data) **to 73%** on more challenging real-world data set (additionally, using Pacha et al.'s evaluation method as a 2nd benchmark: from 24.8% to 47.5%)

Elezi, Tuggener, Pelillo & Stadelmann (2018). *«DeepScores and Deep Watershed Detection: current state and open issues»*. WoRMS @ ISMIR'2018.
Pacha, Hajic, Calvo-Zaragoza (2018). *«A Baseline for General Music Object Detection with Deep Learning»*. Appl. Sci. 2018, 8, 1488, MDPI.

Conclusions

- Document analysis is a **very fruitful use case** for Deep Learning (for business + R&D)
- **Latest research** is **applied** and deployed in «normal» businesses (non-AI, SME)
- It does not need big-, but some **data** (**effort usually underestimated**)
- DL/RL **training** for new use cases **can be tricky** (→ needs thorough experimentation)
